MSDK2.5 废弃接口变更说明

说明: @Deprecated标识之前废弃的接口或字段也能使用, 不过建议使用新的接口

1、飞行任务中FlightMissionKey 废弃接口变更

```
@Deprecated("use KeyExit to exit mission")
 val KeyStop: AutelActionKeyInfo<Void, Void> = AutelActionKeyInfo(
     component.value,
    MessageTypeConstant.MISSION_WAYPOINT_STOP_MSG,
    AutelEmptyConvert(),
    AutelEmptyConvert()
 ).canPerformAction(true)
 /**
 * 退出航点任务
 */
 val KeyExit: AutelActionKeyInfo<Void, Void> = AutelActionKeyInfo(
 component.value,
 MessageTypeConstant.MISSION_WAYPOINT_EXIT_MSG,
 AutelEmptyConvert(),
 AutelEmptyConvert()
 ).canPerformAction(true).canRetry(true)
```

2、任务管理中MissionManagerKey 废弃接口变更

```
/**
    * 是否忽略风险强制降落
   @Deprecated("KeyIgnoreLandingRisk has Deprecated Please use
KeyIgnoreLandRisk",
       level = DeprecationLevel.WARNING)
   val KeyIgnoreLandingRisk: AutelKeyInfo<Boolean> =
       AutelKeyInfo(
           component.value,
           MessageTypeConstant.IGNORE_LANDING_RISK,
           AutelBooleanConvert(),
       ).canSet(true).canGet(false)
   /**
    * 0: 取消本次降落行为,用户可手工打杆控制飞机移动到安全位置再降落<br>
    * 2:忽略风险强制降落
    */
   val KeyIgnoreLandRisk: AutelKeyInfo<Int> =
       AutelKeyInfo(
           component.value,
           MessageTypeConstant.IGNORE_LANDING_RISK,
           AutelIntConvert(),
       ).canSet(true).canGet(false)
```

3、DroneSystemStateLFNtfyBean 字段获取变更

```
/**
    * 飞机通用参数上报(2HZ)
   val KeyDroneSystemStatusLFNtfy: AutelKeyInfo<DroneSystemStateLFNtfyBean> =
AutelKeyInfo(
       component.value,
       MessageTypeConstant.DRONE_SYSTEM_STATUS_LF_NTFY,
       FlightControlStateLFConvert()
   ).canListen(true
   /**
    * 剩余飞行时间
    */
   @Deprecated("字段废弃,在多电池飞机上不会返回", replaceWith =
ReplaceWith("getFuseRemainingFlightTime"))
   var remainingFlightTime: Float = 0f,
   /**
    * 电池剩余电量
    */
   @Deprecated("字段废弃,在多电池飞机上不会返回", replaceWith =
ReplaceWith("getFuseBatteryRemainingPower"))
   var batteryRemainingPower: Int = 0,
   /**
    * 电池电量百分比
    */
   @Deprecated("字段废弃,在多电池飞机上不会返回", replacewith =
ReplaceWith("getFuseBatteryPercentage"))
   var batteryPercentage: Float = 0f,
   /**
    * 电池温度
    */
   @Deprecated("字段废弃,在多电池飞机上不会返回", replaceWith =
ReplaceWith("getFuseBatteryTemperature"))
   var batteryTemperature: Float = 0f,
   /**
    * 电池当前电压
    */
   @Deprecated("字段废弃,在多电池飞机上不会返回", replacewith =
ReplaceWith("getFuseBatteryVoltage"))
   var batteryVoltage: Float = 0f,
   /**
    * 电池当前电流
    */
   @Deprecated("字段废弃,在多电池飞机上不会返回", replaceWith =
ReplaceWith("getFuseBatteryCurrent"))
   var batteryCurrent: Float = 0f,
```

4、FileConstants.getalbumbaseip() 变更

获取相册的方法 由 FileConstants.getalbumbaseip() 修改为

```
DeviceManager.getDeviceManager().getActiveAlbumBaseUrl()
```

5、LensTypeEnum.Zoom, SDKManager.get().gimbalDeviceType 变更

6、SDKConstants引用路径修改

SDKConstants.STREAM_CHANNEL_16110 可见光等 码流端口涉及SDKConstants引用 路径 有修改

```
com.autel.drone.sdk.vmodelx.constants.SDKConstants 更新为com.autel.drone.sdk.SDKConstants
```
